

COST COMPETITIVE AND EXPERIENCED

Catch the Wave of the Future

"We install more Refractory in one hour than others install all day."

Reduce Your Downtime for **Refractory Maintenance** with the latest in technology: **Shotcrete** for Boiler Cyclones, Furnaces and Ash Hoppers!

CHRISTY INDUSTRIAL SERVICES is the leader in installation of Refractory Shotcrete for Power Generation.

SPEED

- ▶ Installation time is reduced by over 50% vs. traditional ramming and gunite methods
- ▶ We set records for turning around your boiler — 6 tons per hour per crew
- ▶ We install more Refractory in one hour than others install all day
- ▶ Rely on Christy to meet your outage's critical path requirements

SAFETY

- ▶ Fewer people on site = fewer injuries
- ▶ Shotcrete is ergonomically safer than pounding plastic or guniting
- ▶ Shotcrete has up to 4 times LESS rebound, waste and dust than guniting
- ▶ Other trades can work side-by-side with us due to low dust

PERFORMANCE

- ▶ Our shotcrete materials have superior physical properties when compared to ram or gunite
- ▶ Our customers are seeing substantially increased life compared to gunite or ram
- ▶ Shotcrete can be walked upon within minutes of shooting — no risk of damage due to foot traffic, scaffolding, etc.

Our methods are PROVEN to be FASTER, SAFER, and LONGER LASTING!
