

CERAMIC AUTO LADLES

CUSTOM CRAFTED™ Ceramic Auto Ladles for robotic auto ladle transfer systems have the following benefits:

- Non-wetting in non-ferrous applications.
- Utilizes a flexible mounting system to adapt to various robot configurations
- Increases auto ladle life by 2-3 times over conventional ladles
- Will not leach foreign metals into your melt (iron, chrome, etc.).
- Maintains heat to reduce dross and oxide formation.
- Requires less energy to keep warm.
- Available in a range of sizes from 1 to 10 pounds
