

INNOVATORS OF INDUSTRIAL CERAMIC PRODUCTS

SILICON CARBIDE RESISTIVE HEATING ELEMENTS

MATERIAL

- Recrystallized Silicon Carbide

APPLICATION

- Electric Heating Equipment

USES

- Annealing
- Assaying
- Brazing
- Ceramic Firing
- Ferrites
- Forging
- Glass Industry
- Heat Treat Furnaces
- Heated Launderers
- Immersion Tube Heaters
- Laboratory Equipment
- Metal Holding Furnaces
- Powder Metallurgy

PROPERTIES

- Excellent refractory properties
- High emissivity
- Quiet, clean source of heat
- Good chemical stability
- Good acid resistance
- Can be mounted horizontally or vertically
- Sets are resistance matched +/- 10%

TYPES AVAILABLE

Solid

Solid "U"

**Solid 5 segment with
2 hot zones**

Spiral

Clamps and braids

Ceramic terminal tubes
